PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building production-grade web applications and completing an SDE internship at a fintech startup. Strong problem-solving skills with 400+ DSA problems solved on LeetCode and experience designing scalable, role-based systems. Currently learning AI and Machine Learning, focusing on data handling and model fundamentals.

EDUCATION

Bachelor of Technology (Computer Science)	2024 - 2028
Newton School of Technology, Rishihood University	Grade: 7.86/10.0
Intermediate (Class XII)	2022 - 2023
DAVMM Public School	Grade: 84.4%
Matriculation (Class X)	2020 - 2021
DAVMM Public School	Grade: 81.0%

INTERNSHIPS

SDE Intern	May 2025 - July 2025
Bluestock Fintech	<i>Remote</i>

- Contributed to the development of a **full-stack fintech web application** focused on improving platform structure, backend coordination, and overall system efficiency across core business modules and internal operational workflows.
- Built reusable React components, developed backend APIs, integrated structured database models and collaborated via GitHub for detailed code reviews and controlled version management processes within the complete development lifecycle.
- Improved **system maintainability** and enabled smoother **feature integration** across frontend and backend layers.

PROJECTS

Akash Jewellers – Smart Jewellery Store Management System (Github) (Demo)	November 2025
--	---------------

- Developed a full-stack jewellery store management system for inventory tracking, dynamic pricing updates, secure admin operations and streamlined store management processes across multiple product categories and pricing structures.
- Implemented **role-based authentication**, designed APIs, and integrated PostgreSQL with Prisma, Next.js, and Node.js.
- Enabled secure **access control**, real-time pricing updates, and efficient **inventory management** with structured admin workflows and clearly separated customer-facing functionalities to ensure consistent operational accuracy and reliability.

BookMyYatra (Github) (Demo)	April 2025
--	------------

- Built a full-stack hotel booking platform allowing users to browse hotels, compare listings, and manage reservations through a structured and scalable web-based system architecture with optimized database connectivity and routing logic.
- Developed authentication mechanisms, implemented **protected APIs**, and configured environment-based setup using Next.js, Express, and PostgreSQL for secure backend communication and efficient structured relational data management.
- Ensured secure **booking management** and reliable **production deployment** with controlled user access levels.

CERTIFICATIONS

Young Turks 2025 Naukri.com (Link)	September 2025
Scored 94.87 in Round 1, demonstrating strong analytical and problem-solving skills with business aptitude proficiency.	

SKILLS

Computer Languages: HTML, CSS, JavaScript, Python, TypeScript

Software Packages: React, Node.js, Pandas, Figma, Tailwind, Express JS, MySQL

Additional Courses: Data Structure

EXTRA-CURRICULAR ACTIVITIES

- Mentor – Senior–Junior Mentorship Culture** – Guided juniors in academics, campus involvement and smooth college transition support throughout their first academic year and adaptation phase within the university environment.
- Organizing Committee Member, University Sports Fest** – Managed event logistics, coordinated athletes and supported smooth execution of sports activities across university departments during major annual campus events.
